

Satellite radio provides variety and quality that are not available elsewhere. I commute to and from work and I am on the road about two hours a day. XM Sattelite Radio makes my ride smoother. I pay for these services, in the same way that I pay for cable or satellite TV. It should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Personally, I would like to see XM Satteline Radio increase both their traffic and weather coverage as well as add additional music channels. Respectfully, I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand deserve and pay for!
